

Improve survival in Heart Failure & Post MI Patients

ZIMTUS

Eplerenone 25/50 mg tablets

... Saves Even More Lives

Well tolerated and free of side effects as compared to spironolactone

- Highly selective and therefore not associated with the adverse effects of gynecomastia & breast pain
- A shorter half life ensures a lower incidence of hypokalemia
- Preferred especially in patients who have experienced or are at risk of developing adverse conditions

Improve survival in Heart Failure & Post MI Patients

ZIMTUS

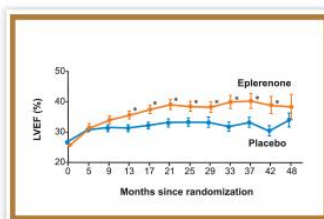

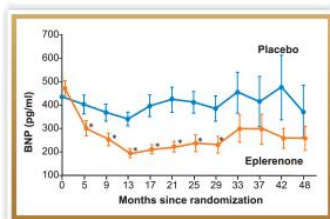

Eplerenone 25/50 mg tablets

... Saves Even More Lives

Improves clinical outcomes in patients with heart failure with ejection fraction <35%

- Documented efficacy in reducing hospitalization for any cause
- Enables improvement in plasma BNP & LVEF
